

PerSec Training for Defence Industry

Human-centric personnel security lifecycle governance for DISP

This is the only available training that delivers a complete lifecycle approach to Personnel Security compliance for DISP members. It is developed specifically to enable individuals in the Australian Defence industry to meet requirements of the Personnel Security domain.

The course delivers immediately usable knowledge and skills aligned with DSPF, PSPF, and ISM. It enhances organisational Personnel Security compliance, risk management, and decision making through a human-centric lens while reducing inefficiencies through siloed approaches.

Presenter bio

Training is delivered by Andi Gynn, founder of Servare and convenor of the Defence Industry Security Community of Practice.

Andi has over 17 years of experience across security, risk, and regulatory frameworks in both government and private enterprise. She is a qualified Vetting Analyst with practical experience supporting both above and below the line Defence work, and has provided DISP advisory to entities for over four years.

Andi is known for delivering practical, defensible security guidance focused on improving assurance outcomes and enabling entities to make confident and compliant decisions.
